

Khaled Fathy

Data Analyst

khaled.fathy.data@example-mail.com | Cairo, Egypt

Summary

Data analyst with 3 years of experience in subscription-business analytics, focused on churn and retention analysis.

Experience

Data Analyst, Streamline Media (2022 - Present)

- Built the churn-prediction feature pipeline used by the retention team, and validated it against three months of holdout data before it informed a live retention campaign.
- Analyzed a pricing-change A/B test, correctly flagging that the observed short-term lift was likely a novelty effect based on the trend across the test window, which was later confirmed by the four-week follow-up data.
- Maintain the team's subscription-metrics dashboard in Looker, used weekly by the retention and marketing teams.

Junior Data Analyst, Streamline Media (2021 - 2022)

- Supported senior analysts with SQL queries for recurring reports.
- Learned Looker and dashboard design conventions used by the team.

Education

B.Sc. in Economics, Cairo University

Skills

SQL, Looker, Python (pandas), A/B testing
